PACKAGE CONCIERGE®

# Package Room

Manage Package Peaks & the Big Stuff!

Pair the Package Concierge® Package Room system with the Premier or Express Locker series to create space for overflow during peak delivery times and secure larger delivered items like furniture and mattresses that are too large for the lockers.

The Package Room is a great indoor package management solution for those with space constraints and it can accommodate appliances for deliveries needing refrigeration. It also provides space for carrier pick-up of outbound and return packages, relieving congestion in the management office.

Eliminate 100% of the package handling in your community by adding a Package Room and free up staff to spend time on other priorities.
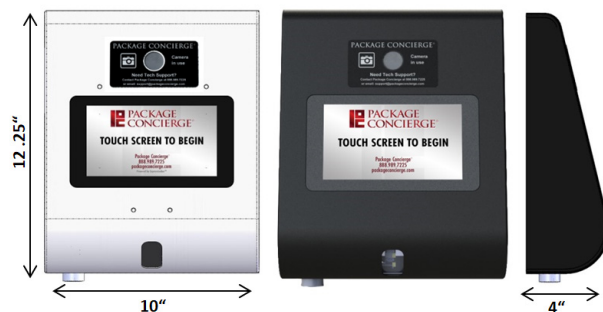

Features

- Surface-mounted kiosk measures 10" W x 12.25" H x 4" D
- 7"x5" touchscreen, camera and barcode reader
- Steel construction with powder coat finish in black or white

- Electrical: 120V A/C, 15 Amp
- Internet: Ethernet or Wifi
- Designed for indoor use
- Software accommodates special operational needs specific to package rooms
- Operating temperature range: 32°F to 95°F

Accessibility Considerations

When choosing a package room location, ensure the room is large enough for shelving and turnaround requirements and has a clear path from the building entrance.
