

Material Specification

Built to last!

Using durable powder coating methods which do not contain VOCs, Package Concierge® products resist weather deterioration; thereby reducing the need for regular replacement. These quality products not only protect resources, but reduce costs due to their extensive product life. If however, they have come to the end of their long life, all product materials are recoverable for recycling.

Material Safety Data Sheets (MSDS)

MSDS sheets are not required for any Package Concierge® products and packaging, as they are exempt from the labeling and material safety data sheet requirements as provided under Title 29 CFR Part 1910.1200; nor do the product, or their packaging, contain any asbestos or PCBs. Product packaging materials are recyclable.

Safety Compliance

The Package Concierge® Element locker series, manufactured by Florence Corporation, is ETL certified to UL-2361 in compliance with US electrical and fire safety standards and is identified with the ETL Listed Mark. (ETL Certification #4010527)

Intertek

Element Locker Series

LEED Information

The Package Concierge® Element Locker Series is manufactured in Manhattan, KS and contains 20% pre- and 30% post-consumer recycled content.
